PROFESSIONAL SUMMARY

A dedicated and quick-learning Full Stack Developer fresher with a strong foundation in front-end and back-end web development. Hands-on experience gained through academic projects, internships, and professional training, with exposure to developing responsive applications and working collaboratively in team-based environments. Passionate about learning new technologies and contributing to real-world software solutions.

TECHNICAL SKILLS

- **Operating Systems:** Windows
 - **Markup Languages:** HTML, CSS, JSON
 - **Scripting Languages:** JavaScript (ES5, ES6+)
 - **Frontend Technologies:** React JS, Hooks, Functional Components, Router, React Query
 - **UI Frameworks:** Bootstrap, React Bootstrap, MUI, Tailwind CSS
 - **Backend Technologies:** Node JS, Express JS
 - **Databases:** MySQL, MongoDB
 - **3rd Party Integrations :** Google, Meta, Microsoft, Firebase etc.
 - **Payment Gateways:** Razorpay, Stripe
 - **Dev Tools:** VS Code
 - **Version Control:** Git, GitHub
 - **Concepts:** REST APIs, CRUD Operations, MVC Architecture (Basic)
 - **Other Skills:** Debugging, Problem Solving, Team Collaboration
-

EDUCATION

Degree: BCA running (TYBCA SEM - 6)

College: Prof V.B. Shah Institute of Management & R.V. Patel College of Commerce (Eng. Med.) & V.L. Shah College of Commerce (Guj. Med.) & Sutex Bank College of Computer Applications & Science, Amroli.

Field: Information Technology

INTERNSHIP EXPERIANCE

Full Stack Development

JBS Technology

- Worked on real-time web application development under senior developer guidance.
 - Assisted in developing responsive user interfaces using HTML, CSS, and JavaScript.
 - Supported backend development tasks such as API creation and database integration.
 - Participated in code reviews, debugging, and testing activities.
-

TRAINING & CERTIFICATION

Full Stack Development

JBS Technology

- Completed hands-on training in front-end and back-end technologies.
 - Learned to build full-stack applications using React, Node.js, Express, and MongoDB.
 - Developed multiple mini-projects to strengthen practical understanding.
 - Gained knowledge of version control using Git and GitHub.
-

PROJECTS

1. FurniCraft – E-Commerce Furniture Platform

This project aims to provide an efficient and user-friendly platform for furniture retailers and customers to manage and conduct online furniture sales. The software includes several key modules:

- **Product Management:** Maintain comprehensive catalog of furniture products, including regular and premium collections, with detailed information such as name, price, images, category (Chairs, Sofas, Tables), and descriptions. Admin can add, edit, and delete products seamlessly.
- **User Management:** Provide secure user authentication and registration system with password management, security questions for password recovery, and role-based access control for customers and administrators.

- **Shopping Cart:** Enable customers to add products to cart, manage quantities, and maintain persistent cart data across sessions for seamless shopping experience.
- **Favorites / Wishlist:** Allow customers to save and manage their favorite products for quick access and future purchase decisions.
- **Order Management:** Create, process, and track orders from placement to completion. Admin can view pending orders, mark them as completed, and manage order status efficiently.
- **Payment Processing:** Integrate multiple payment methods including Cash on Delivery (COD), Credit/Debit Cards, UPI, and Net Banking to provide flexible payment options for customers.
- **Address Management:** Enable customers to store and manage multiple delivery addresses for convenient order placement and shipping.
- **Admin Dashboard:** Provide comprehensive admin interface for managing products (both regular and expensive collections), viewing and updating order status, managing admin profile, and overseeing the entire platform operations.
- **Product Discovery:** Implement advanced filtering and search capabilities including category-based filtering, price range filters, search by product name, and sorting options (low to high, high to low) to help customers find desired furniture items quickly.
- **Theme Customization:** Offer dark and light mode themes with persistent user preferences to enhance user experience and reduce eye strain.
- **Email Notifications:** Automate email notifications to customers upon order completion, keeping them informed about their purchase status.
- **Responsive Design:** Ensure optimal user experience across all devices with mobile-responsive navigation, drawer menus, and adaptive layouts.

The FurniCraft project demonstrates my expertise in creating full-stack e-commerce solutions that enhance the online shopping process, improve customer engagement, provide comprehensive admin tools, and deliver a modern, user-friendly shopping experience for furniture retail businesses.
